Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10 rejected under 35 U.S.C. 102(b) as being anticipated by Dosal (US 3,165,244). Dosal teaches a frame 4;

an external inflatable body 6 including an external trunk and an external sleeve 6c with a distal end;

an internal inflatable body 8c supported by the frame 4 and disposed within the external inflatable body, the internal inflatable body including an internal trunk and an internal sleeve on the internal truck and having a distal end;

a connecting device 7c connected to the internal distal end of the internal inflatable body 8c and the distal end of the external sleeve 6d.

As to claim 11, the connecting device 7c is capable of being detached.

As to claim 12, Dosal illustrates the connected device 7C being at a distance of the centerline.

As to claim 13, Dosal illustrates the connecting device 7c being at a lower section of the internal and external sleeve below the centerline.

Art Unit: 3765

As to claim 14, Dosai illustrates a predetermined length between the internal distal end and the external distal end of the inflatable body and the connecting device substantially the same as the predetermined length.

As to claim 15, Dosai illustrates the connecting piece 7c being connected to the front end of the external sleeve 6c and internal sleeve 8c.

As to claim 16, Dosai states the connecting piece 7c is elastic (col. 2 lines 38).

As to claim 17, Dosai further illustrates the elastic cord (sleeve) around inner sleeve 8c.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dosai (US 3,165,244) in view of Paris (US 2,948,444). Dosai illustrates the device above. Paris illustrates a pressing apparatus including a weight 40 disposed at the distal end of the sleeve. It would have been obvious to one of ordinary skill in the art to combine the teachings of Dosai and Paris to provide a smoother sleeve. It is inherent the cuff would be tensioned via the weight 40.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form PTO-892.
